

Sending Emails

Setting Up React Email

```
npm i react-email @react-email/components
```

Creating a Template

```
import { Html, Body, Container, Text } from '@react-email/components';

const WelcomeTemplate = () => {
  return (
    <Html>
      <Body>
        <Container>
          <Text>Hello World</Text>
        </Container>
      </Body>
    </Html>
  );
};
```

Sending an Email

```
import { Resend } from 'resend';

const resend = new Resend('api-key');

await resend.emails.send({
  from: '...',
  to: '...',
  subject: '...',
  react: <WelcomeTemplate />
})
```
